(Incorporated in the Cayman Islands with limited liability)

(Stock Code: 8092)

QUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 31 DECEMBER 2012

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a high investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of this announcement.

This announcement, for which the directors (the “Directors”) of ITE (Holdings) Limited (“ITE” or the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the “GEM Listing Rules”) of the Stock Exchange for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

BUSINESS REVIEW

The Management of the Group has continued to utilize our professional and committed workforce and financial resources to achieve maximum return to our shareholders.

During the Period, ITE Smartcard Solutions Limited (ITESö) has been awarded a new contract by a tertiary education client to expand their existing smartmeter system. The system, which was designed and developed by ITES back in 1999, has been in used and serviced by ITES for more than 12 years. The new order demonstrates that the solution and professional services of ITES have continued to win our clients' satisfaction. ITES received a new order from a law enforcement department for the supply of our advanced guard tour reader, HOMAC ML-100GTB, which is a dual frequency RFID guard tour reader with Bluetooth connectivity. The product was designed and developed to meet very demanding security requirements and needs. ML-100GTB supports low frequency RFID tag of 125KHz/134KHz which are the traditional durable RFID tag used for wall-embedded guard tour applications. The tags using RFID chips from EM and Texas Instrument are commonly available and have been used in thousands of installation for many years. Besides the low frequency tag read/write capability, ML-100GTB also supports the contactless smartcard technology of ISO 14443 Type A Mifare and ISO 15693 which are widely used for the identification card of the guard tour personnel. By integrating the low frequency tag technology and high frequency card technology, this product can function and serve for more sophisticated management needs. Together with the unique built-in Bluetooth connectivity, high speed wireless data collection from the reader to the host system is now possible. This feature allows the product casing to be developed in a more durable and reliable way. The completed solution, which includes software intelliGT, is now available for clients from different sectors.

ITES is also pleased to announce the addition of a new Type Approval from the Octopus Cards Limited. The new Type Approval was conducted for the Octopus Cards payment requirements for electric vehicle fast charging. Our electric vehicle fast charging station EFS-10, which was jointly developed with the Hong Kong Automotive Parts and Accessory Systems R&D Centre, has started the certification process with CHAdeMO Association in Japan. The process is expected to be completed in the second quarter of 2013. Upon the completion, the prototype for 2X50KW charging station will also be ready for testing. Being very positive towards the development and opportunities related to electric vehicle, ITES shall continue to invest into the technologies and related solutions.

Our R&D arm, RF Tech Limited (RFTö) is pleased to announce that our innovative products, "Embedded Computer Vision and RFID Enabled Book Enrolment Mechanism" and "HOMAC® RD-200AB ISO 15693 Handheld Antenna Reader", have won the Certificate of Merits in the 2012 Hong Kong RFID Awards. Our "HOMAC® RD-200AB ISO 15693 Handheld Antenna Reader" has also won the Machinery and Machine Tools Design Certificate Merit in the 2012 Hong Kong Awards for industries. The Hong Kong RFID Awards 2012 presentation ceremony was held in conjunction with the GS1 Hong Kong Supply Chain Management Excellence Summit 2012 on 9 November 2012 at the Hong Kong Convention and Exhibition Centre.

The Group has managed to return to profit after several quarters of difficulties. The Directors shall continue to focus on improving efficiency, new product development and professional services enhancement. We are optimistic that the profits will be maintained for the next quarter.

For the Period, the Group had recorded total revenue of approximately HK\$21 million, representing an increase of 10% over the same period in 2011. 1. Basis of preparation

The unaudited consolidated financial statements have been prepared in accordance with the Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants (øHKICPAö) and applicable disclosure requirements of the Hong Kong Companies Ordinance and the GEM Listing Rules.

The measurement basis used in the preparation of the financial statements is the historical cost.

The principal accounting policies used in the preparation of the unaudited consolidated financial statements are consistent with those adopted in the preparation of the annual consolidated financial statements of the Group for the year ended 31 March 2012.

2. Adoption of new and revised Hong Kong Financial Reporting Standards (“HKFRSs”)

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting period of the group and the company. The adoption of these new and revised HKFRSs did not result in substantial changes to the Groupø accounting policies and amounts reported for the current year and prior years.

The Group has not applied the new HKFRSs that have been issued but are not yet effective. The application of these new HKFRSs will not have material impact on the financial statements of the Group.
