### **CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)**

## **BUSINESS REVIEW**

The management of the group has continued to utilize our professional and committed workforce and financial resources to achieve maximum return for our shareholders.

During the period, ITE Smartcard Solutions Limited (“ITES”) is very pleased to be awarded with a new contract by The Chinese University of Hong Kong (“CUHK”) for the Supply and Installation of Octopus Based Hostel Payment System. Under the scope of contract, ITE shall provide all hardware, software and implementation services for Octopus payment applications for more than six hundred units of air conditioners and laundry machines in the hostels of Shaw College of CUHK. This new payment system is a networked online system as compared with the old offline system. ITES is very pleased to continue to provide our products, solution and services to the CUHK whom we have been serving since 1999. Again, the contract award is a testimonial for ITE : Innovation, Technology and Excellence.

We are also pleased to announce that a new U.S. patent application of ITE has been published by the U.S. Patent and Trademark Office on June 8, 2017 under Publication No. 2017/0161724 A1.

This US patent titled “Radio frequency identification card and mobile phone interlinking embedded electronic payment apparatus and methods” is an invention of an apparatus and methods for renewing payment based on interlinking of radio frequency identification cards, mobile phones with electronic payment apparatuses implemented as embedded devices. The application supports service fee payment and remote renewal payments, as well as real-time collection of the security and environmental information relating to the electronic payment apparatus. A network of the electronic payment apparatuses can be used to implement Internet of Things and to form part of the information and communication technology infrastructure of a smart city. The collection of the foregoing security and environmental information would facilitate the implementation of smart city that uses innovative solutions to address issues in one or more aspects of the city including governance, economy, mobility, environmental, living and people, thereby improving the quality of life of the citizens and enhancing the sustainable growth and competitiveness of the city.

This year we welcome twelve new interns joining ITE. They come from City University of Hong Kong, the Hong Kong Polytechnic University, the Chinese University of Hong Kong and Royal Melbourne Institute of Technology with different disciplines from electronic, information, mechanical, bioengineering, electrical, industrial and manufacturing system engineering. ITE has been supporting Business Practice Internship, Work Study Program and Industrial-based Training Program for University Undergraduates since 2006. We assist the students to gain solid experience and knowledge in their respective fields through actual work responsibility. Up to this summer, more than one hundred and twenty interns have completed their on-the-job training programs with ITE.
